### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Fedorochko on 08/13/07. Please amend as following:

24. (Currently Amended) A computer mouse comprising:
- a housing;
  - a plurality of actuators;
  - a communication interface configured to connect the mouse to a computer system and to receive a signal from the computer system corresponding to an event occurring in a computer application running on the computer system;
  - a motion detecting system for determining relative movement of the mouse; ~~and~~
  - an optical projection system including a light source and a movable image forming element located within the housing, wherein in response to the signal received from the computer system the optical projection system is configured to project an image based on the computer application and the event; and
- wherein the mouse is configured to rest on a supporting surface and the optical projection system is configured to project an image onto the supporting surface.

Art Unit: 2629

25. (Canceled).

26. (Currently Amended) The computer mouse according to claim ~~25~~ 24, wherein the optical projection system includes an LED, a mirrored surface, and optics.

28. (Currently Amended) The computer mouse according to claim ~~25~~ 24, wherein the optical projection system includes an array of LEDs.

29. (Currently Amended) A method of notifying a user of an occurrence via a cursor control device configured to project images, the method including the steps of:

projecting a first image onto a display region via a cursor control device in communication with a computer system;

receiving a signal from the computer system corresponding to an event occurring in a computer application running on the computer system; ~~and~~

in response to the signal received from the computer system, projecting a second image, different from the first image, onto the display region via the cursor control device wherein the second image is based on the computer application and the event; and

wherein the display region is in an area adjacent a housing periphery of the cursor control device such that the projecting steps include projecting the first and second images onto a supporting surface adjacent the housing periphery.

30. (Canceled).
